

Atiqullah Ahmadzai

Full-stack software engineer with a solid background in cloud infrastructure, scalable application architecture, and backend systems.

Phone: [+49 177 2838507](tel:+491772838507)

Email: atiqullah.ahmadzai@hotmail.com

Website: atiqullah.dev

LinkedIn: [atiqullah-ahmadzai](https://www.linkedin.com/in/atiqullah-ahmadzai)

Core Skills

Programming

Python, JavaScript, Bash, PHP

Backend

Express, Django, Laravel, MySQL, MongoDB, PostgreSQL, Redis, Riak

Frontend

React, AntD, Tailwind

DevOps

AWS, GCP, Docker, HA, CI/CD, Kubernetes

AI and ML

MCPs, N8N, Flowise, RASA, Langchain, Langgraph, MI Models,

Languages

- English (Professional)
- Pashto (Native)
- Persian (Bilingual)
- Urdu (Good)
- German (Basic)

Projects Developed

- [HesabPay Payment Solutions](#)
- [WhatsApp Banking Bot](#)
- [Pulsar AI Bidding System](#)
- [BBR Taxi Services](#)
- [Afghanet ICT Solutions](#)
- [Event Management Systems](#)

Hackathons

- Angel Hack 2017 (Kabul) - 2nd Winner Health friend App
- Angel Hack 2018 (Kabul) - Top Five Real time car no# plate recognition app

Professional Experience

05/2025 – 10/2025

Full Stack Engineer – [Media force](#), Berlin (Part Time Remote)

- Developed APIs and automated flows for campaign management system.
- Used Appium, Selenium and Playwright to automate workflows.
- Used N8N and Langchain for creating LLM agents for writing automation code and performing other tasks like NER and system debugging.
- Crawled millions of data points and maintained databases in GCP for high availability and redundancy.

09/2021 - 04/2023

Senior Backend Developer - [Moore Global](#), Afghanistan (Full Time Onsite)

- Developed a Payment System app (HesabPay) with a million active users and funded by Algorand Foundation and USAID. built with Laravel, Django and Flutter.
- Achieved more than 20 integrations with banks and vendors.
- Implemented blockchain (Algorand) as backend.
- Oversaw project architecture and led the technology team.
- Deployed solutions like ELK for logging, MySQL Clustering for handling multiple transactions at the same time.
- Achieved PCI DSS, Merchant Level 2.

02/2022 - 12/2022

Full Stack Developer – [Searix](#), Singapore (Part Time Remote)

- Designed cutting-edge event management systems with PHP Frameworks (Laravel and Codeigniter).
- Worked with major corporations like HP and Pico at Searix.
- Developed solutions including face detector, finger pose detector, games, and more.
- Managed multiple projects simultaneously.
- Ensured delivery of the right products and functionalities.
- Worked with TensorFlow and three.js.

06/2018 - 09/2021

Backend Developer – [Zinzir LTD](#), Afghanistan (Full Time Onsite)

- Worked on numerous projects with Laravel and MEAN Stack.
- Ensured optimal interactivity with users.
- Developed REST APIs and its documentation.
- Implemented software-level security.

Education

04/2023 – Present (Thesis on going)

Master of Science in Computer Science – Passau University

Germany, Passau.

01/2015 - 12/2018

Bachelor's in Computer Science (Software Engineering) – Karwan University

Kabul, Afghanistan.

Achievements

- [Certified Ethical Hacker v10](#) – EC Council
