Certified Ethical Hacker v10 — EC Council

TOEFL — Score: 102, Year: 2023

## Experience

---

### Senior Backend Developer (Sep 2021 – Apr 2023)

Moore Global – Kabul (Full Time – Onsite)

#### HesabPay (Funded by Algorand Foundation) - Laravel, Django, Node, SpringBoot

- Led backend development for HesabPay, a blockchain-integrated payment platform with over **1.2 million active users**.
- Integrated **20+ financial institutions and telecom providers**, utilizing **Laravel, Django, and Flutter**.
- Architected **Algorand blockchain-based** solutions to ensure transaction security and scalability.
- Deployed enterprise-grade **microservices, ELK Stack, and MySQL clustering** to support **1M+ transactions/month**.

#### Core Team Leadership & Delivery - CI/CD, GIT, UI/UX, Leadership, Management

- Directed a team of **25 engineers and designers**, delivering **5+ large-scale fintech and logistics projects** ahead of schedule and under budget.
- Oversaw project planning, sprint execution, and CI/CD implementation to streamline backend delivery.

### Full Stack Developer (Feb 2022 – Dec 2022)

Searix Solutions Inc. – Singapore (Part Time – Remote)

#### Interactive Event Systems - Laravel, TensorFlow, Python, Codeigniter

- Developed tailored solutions using **Laravel (PHP)** and **Django (Python)**, improving event management efficiency by **30%**.
- Developed event management and campaign solutions for global clients like **HP** and **PICO**.
- Built and deployed **AI-powered face detectors, finger pose detectors, and interactive mini-games** for corporate exhibitions.
- Handled **5+ concurrent client projects**, ensuring **100% on-time delivery** with exceptional code quality and UI performance.

### Web Developer (Sep 2021 – Dec 2021)

Crinimo Studio – Chile (Part Time – Remote)

#### Advanced Web UI/UX Solutions - Three.js, JavaScript, Django

- Delivered **3 high-profile websites** featuring **parallax animations**, achieving a **40% increase in user satisfaction** and **25% boost in client retention**.
- Enhanced **page load speed by 30%** across **10+ platforms**, optimizing for SEO and performance.
- Tech Stack: **Laravel, Three.js, JavaScript, HTML5, CSS3** – created visually rich and highly interactive UIs.

### Backend Developer (Jun 2018 – Sep 2021)

Zinzir LTD – Kabul (Full Time – Onsite)

#### Custom Software Solutions for Conferencing - WebRTC, Python, React

- Built a **video conferencing system with WebRTC**, enabling **50,000+ online sessions** for educators during the pandemic.
- Designed a **WhatsApp banking bot** integrated with **Flexcube**, used by **100,000+ monthly users** of an Islamic bank.
- Expanded the tech stack with **Laravel** and **MEAN Stack**, securing **\$2M in new contracts** and delivering **15+ enterprise apps**.
- Designed **secure REST APIs**, reducing vulnerabilities by **40%**, and optimized UI/UX to increase user engagement by **25%**.
